## How risky is it?

The value of the Fund can go down as well as up. You could lose money. One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

## No guarantees

Like most mutual funds, this Fund doesn’t have any guarantees. You may not get back the amount of money you invest.

## Risk rating

IG Wealth Management has rated the volatility of this Fund as **low**.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the *What are the Risks of Investing in the Fund?* section of the Fund’s simplified prospectus.

## How much does it cost?

### 1. Sales charges

Generally, there are no purchase options that attract sales charges.

When you buy this series of the Fund, IG Wealth Management may pay your IG Advisor a sales bonus of up to 2.50%. IG Wealth Management may pay your IG Advisor an additional payment of up to 40% of the sales bonus if they are in their first four years with us.
